SUMMARY

Senior / Lead iOS Engineer with 8+ years building fintech, streaming, marketplace, and B2C products. Led a 7-person iOS/QA squad at **Okko** (sprint predictability 20–40% → 80–90%, BugRate –14%). At **Gazprombank**, scaled modular architecture to 40+ feature modules, cut build time by 19–24%, and reduced MVP delivery from 6 weeks to 3 via **Server-Driven UI**. Built a B2C dating product from scratch: architecture, Design System, **OAuth**, **WebSocket**, Firebase analytics. Seeking Senior or Lead iOS role in a product-driven team. Open to remote.

WORK EXPERIENCE

Founder & Lead iOS

09/2025 — 08/2026

WhyNot — B2C dating product built from scratch

Remote

- Built a B2C dating product from scratch as Founder & Lead iOS (PO, analytics, UX/UI, iOS),
- Architected the client and modularized the app (**SPM**),
- Built **Design System** from scratch: UI components, states, typography,
- Designed user flows in **Figma** and synced mockups with iOS,
- Designed and implemented profile ranking/sorting to improve retention and return conversion,
- Shipped auth flows: **OAuth/JWT** (Google Sign-In, Sign in with Apple), email verification, password settings,
- Implemented forced update and maintenance mode during technical work,
- Built **WebSocket** chat, push notifications, deep links, and geo filters,
- Integrated **REST API** and realtime backend; aligned API contracts,
- Set up product analytics and funnels in **Firebase GA4**,
- Covered critical paths with tests; conducted **code review**,
- Collaborated with design / backend / QA; decomposed tasks and estimated delivery.

Team Lead iOS

06/2025 — 09/2025

Okko — Sports vertical (streaming)

Saint Petersburg

- Led the Sports vertical: team of 7 (4 iOS, 3 QA) as **Team Lead**,
- Improved sprint delivery: re-estimation, task decomposition, backlog reprioritization,
- Increased sprint predictability from 20–40% to 80–90% within the first month,
- Reduced BugRate from 1,400 to 1,200 target points (~14%) by quarter end,
- Ran RnD for iOS 26 across iOS / iPadOS / tvOS; delivered technical documentation,
- Shipped major “other broadcasts” feature ahead of schedule,
- Conducted **code review**, mentoring, and 1:1s,
- Managed releases via **Feature Toggles** / **Feature Flags** and **Git Flow**,
- Organized demo increments for QA; prepared sprint demos for stakeholders,
- Collaborated with design / backend / QA; decomposed tasks and estimated timelines.

Lead / Senior iOS Developer

03/2022 — 05/2025

Gazprombank — mobile banking

Moscow

- Grew from Senior iOS to **Team Lead**,
- Presented **SwiftUI** adoption strategy and aligned rollout steps,
- Architected and scaled multi-module architecture: 40+ feature modules, Design System / Core / Foundation,
- Optimized build performance by 19–24%,
- Accelerated MVP via **Server-Driven UI**: cut typical feature cycle from 6 weeks to 3,

- Delivered major features: surveys, theme sync, credit score, e-gov, **OAuth**, push, security,
- Refactored legacy **Objective-C**; reduced technical debt,
- Introduced unit/contract testing; owned releases via **FT/FF**,
- Mentored mid-level developers; conducted iOS interviews,
- Won 3rd of 15 teams at Gazprombank Bugathon; company award for 2023.

Senior iOS Developer

10/2020 — 02/2022

Livemaster — marketplace

Minsk

- Integrated Cappasity, Russian Post, and DPD,
- Built loyalty program and buyer/seller profiles,
- Refactored home screen to **Composition Layout**,
- Implemented **Push Extension** for reliable notification delivery,
- Built 3D product scan and in-store visualization.

Senior iOS Developer

10/2020 — 10/2021

NLP (PulseWave) — health-tech startup

Moscow

- Led iOS: real-time pulse measurement via camera and flash,
- Optimized algorithm with **multithreading** / **GCD** and cancellation,
- Built wave animation, history charts, linked devices,
- Conducted iOS interviews and **code review**.

iOS Developer

06/2020 — 10/2020

EPN / Backit — cashback

Kazan

- Built banking wallet and new navigation,
- Refactored UI from frames to **Auto Layout**; dropped Storyboards,
- Conducted iOS interviews and code review.

Middle iOS Developer

10/2019 — 06/2020

Kuban Credit Bank

Krasnodar

- Integrated Faster Payments (**SBP**) ahead of most competitors (except Sberbank),
- Built peer-to-peer transfers between retail clients,
- Shipped Push Notifications / Push Extension; reduced SMS costs by ~60%,
- Built a team of 3 iOS engineers; ran code review and mentoring.

Trainee / Junior Software Developer

07/2019 — 09/2019

EPAM Systems

Moscow

- Practiced **TDD**, unit tests, **Core Data** migrations,
- Applied **SOLID**, Clean Swift, Coordinator, **RxSwift**, SnapKit,
- Participated in code review; communicated in English.

Junior iOS Developer

03/2018 — 06/2019

Avtohelp — roadside assistance social network

Krasnodar

- Developed iOS client for roadside assistance social network,
- Built parts of home screen and profile,
- Maintained the product and fixed bugs.

SKILLS

Languages: Swift, Objective-C, English (B2)

iOS: UIKit, SwiftUI, Swift Concurrency, Combine, RxSwift, GCD / Multithreading, Core Data, XCTest

Architecture: Clean Architecture, VIPER, MVVM, MVC, SOLID, Coordinators, Modular Architecture, Tuist, SPM, CocoaPods

Networking & Realtime: REST API, WebSocket, Socket.IO, OAuth, URLSession, Alamofire

CI/CD & Tools: CI/CD, Fastlane, Jenkins, Git, Git Flow, Bitbucket, GitLab, GitHub, Xcode, App Store, TestFlight

Process: Team Lead, Code Review, Jira, Confluence, Feature Toggles / Feature Flags, Mentoring

Other: Firebase, Figma, Push Notifications, SnapKit, Keychain

EDUCATION

Moscow Technological Institute / Applied Informatics, Internet Technologies and Mobile Applications — 2025 — 2028

Kuban State University / Fundamental Informatics and Information Technology — 2018 — 2022 (incomplete)
