ABOUT

Senior / Team Lead iOS — 8+ years of commercial experience in iOS: big-tech companies and startups in fintech, media and streaming, and marketplaces. At Okko — lead for the sports squad (7 people), sprint predictability 20–40% to 80–90% in a month, BugRate to target, RnD for new platforms. At Gazprombank — 2023 merit certificate for strong performance, 3rd in bugathon; 40+ feature modules, ~30–40% faster builds, SwiftUI team presentation and rollout; faster MVP with service-driving UI (~6 weeks → ~3 weeks). At WhyNot — own B2C dating from scratch: PO + Lead iOS end-to-end, analytics, backend, UX/UI. Focus on delivery quality and impact on the end product.

TARGET

Senior or Lead iOS. Comfortable with process uncertainty when I can shape it and land a working rhythm. Ready to own people, timelines, and quality, and to influence the end product. Full-time, remote; open to occasional business trips.

SKILLS (KEYWORDS)

iOS development: Swift, Objective-C, UIKit, SwiftUI, async/await, GCD, Combine, RxSwift.

Frameworks & SDKs: URLSession, Alamofire, Moya, Core Data, Lottie, Swinject, Firebase, Kingfisher, ObjectMapper, Socket.IO, Keychain, AVFoundation, MapKit, Core Animation, CoreLocation, PushNotifications, SnapKit.

Testing: XCTest, TDD, swift-snapshot-testing.

DevOps & infrastructure: CocoaPods, SPM, Tuist, SwiftLint, SwiftGen, Jenkins, Bash, CI/CD, Git, Bitbucket, GitLab.

Architecture: MVC, MVP, MVVM, VIPER, CleanSwift, Coordinators, SOLID, OOP.

Tools: Xcode, Instruments, Cursor, Proxyman, Charles, Git, Figma.

Process: Jira, Confluence, Scrum, code review, team lead.

WhyNot · Founder & Lead iOS*Sep 2025 — May 2026 · 9 mo*

Founder & Lead iOS. Website: <https://whynotdate.ru>. Roles: product owner, product analytics (Firebase GA4 events and funnels), primary UX/UI and layouts, Lead iOS, backend coordination and API acceptance. Team: backend, QA, Junior iOS; Cursor/Codex for faster iterations without replacing engineering decisions. iOS: fully SwiftUI client (async/await, Combine); modular SPM; WebSocket chat (Socket.IO); push to UI with deeplinks; geo and nearby/same-city flows. API contracts and realtime integration with backend; internal service-side tooling outside the iOS scope. Process: Git, feature branches, API alignment and iOS + backend release cycles. Stack: SwiftUI, async/await, Combine, Socket.IO, SPM, Firebase, CoreLocation, Push Notifications, URLSession.

Okko · Team Lead iOS*Jun 2025 — Sep 2025 · 4 mo*

Team Lead iOS, St. Petersburg. Led the sports squad of 7 (4 iOS, 3 QA). Sprint predictability from 20–40% to 80–90% in a month; BugRate from 1400 to target 1200 by quarter end. Deep RnD for iOS 26 on iOS, iPadOS, tvOS; critical-path docs for Q4. "Other broadcasts" feature delivered ahead of schedule, easing Q3/Q4. Processes: Jira, Confluence, Bitbucket, Agile, code review, release process (FT), Git flow. Stack: CleanSwift, Coordinators, Swinject, Tuist, multi modular architecture, SwiftUI, async/await, Combine, SwiftLint, SwiftGen, CoreData, SnapKit, Firebase, UIKit, GCD, CI/CD.

Gazprombank · Lead / Senior iOS*Mar 2022 — May 2025 · 3 yrs 2 mo*

Lead / Senior iOS, Moscow. Grew from Senior to team lead. SwiftUI session for the team: vs UIKit, integration, trade-offs, aligned adoption steps. Multi-module architecture: 40+ feature modules, ~30–40% faster builds, DesignSystem, Core, Foundation. MVP acceleration with service-driving UI: cut a typical feature cycle from about six weeks to about three. Major features: surveys (stories-like), system vs in-app theme sync, Obj-C card scanner UI refactor, credit score, profile and e-gov, registration and auth, light clients, trusted devices, push, login and security. Onboarding and training for mid developers, 1:1s, mentoring, grooming, tech design, retros, FT/FF releases for team modules. 3rd in Gazprombank bugathon (90+ mobile bank bugs), 2023 merit certificate. Processes: Jira, Confluence, self-hosted GitLab, Agile, code review, Git flow. Stack: UIKit, SwiftUI, async/await, VIPER, Coordinators, Swinject, CocoaPods, SPM, RxSwift, SwiftLint, SwiftGen, CoreData, SnapKit, Lottie, Firebase, GCD, Combine, RxCocoa.

Livemaster · Middle iOS*Oct 2020 — Feb 2022 · 1 yr 5 mo*

Middle iOS, Minsk. Integrations: Cappasity, Russian Post, DPD. Shipped loyalty program, buyer/maker profile, home screen refactor to Composition Layout, Push Extension for reliable delivery, 3D product scan and in-store visualization. Agile (Scrum, story points, retros), code review, Jira. Stack: MVVM + Router, SnapKit, Firebase, Alamofire, ObjectMapper, RxSwift, RxCocoa.

NLP (PulseWave) · iOS Lead*Sep 2020 — Oct 2021 · 1 yr 2 mo*

iOS Lead, medical startup, Moscow. Real-time pulse from camera/flash; not on the App Store — medical validation not passed. Multithreaded algorithm with cancellation, pulse wave animation, history with charts, paired devices, side drawer, multiple app schemes for store limits. iOS hiring interviews, everyone-reviews-everyone code review, quarterly goals, Jira. Stack: MVVM + C, SnapKit, UIKit, Firebase, Alamofire, CoreData, Kingfisher, ObjectMapper.

EPN · Backit (cashback) · iOS Developer

Jun 2020 — Oct 2020 · 5 mo

iOS Developer, Kazan. Bank wallet, new navigation, UI refactor from frames to Auto Layout, programmatic UI instead of storyboards. iOS interviews, Scrum, Jira, code review. Stack: MVVM + C, SnapKit, Alamofire, CoreData, Kingfisher.

Kuban Credit · Middle iOS

Oct 2019 — Jun 2020 · 9 mo

Middle iOS, Krasnodar. FPS integration ahead of competitors except Sberbank. P2P transfers for retail customers, push system cutting SMS costs by about 60%, Push Extension for guaranteed delivery. Built a 3-person iOS team; Jira, Scrum, code review, Redmine. Stack: MVP, MVVM + C, SnapKit, Keychain, EasyDi, CoreData, Kingfisher.

EPAM Systems · Trainee Junior Software Developer

Jul 2019 — Sep 2019 · 3 mo

Trainee Junior Software Developer, Moscow. TDD, unit tests, CoreData migrations, code review, RxSwift, layout with SnapKit, MVP/MVC, SOLID, routing/coordinators, Clean Swift. Trello, DesignSync. Stack: MVP, MVC + R, EasyDi.

Ilya Arzumanyan startup · Junior iOS Developer

Mar 2018 — Jun 2019 · 1 yr 4 mo

Junior iOS Developer. Part of home screen and profile, bug fixing and growing mobile skills. Trello, weekly dailies. Stack: MVP, MVC + C, Alamofire, Kingfisher.

EDUCATION

MTI — mobile application development
