ABOUT ME

- **Senior / Team Lead iOS** — 8+ years of **commercial experience** in iOS: **big-tech companies and startups** in **fintech, media and streaming, and marketplaces**.
- At Okko — **lead for the sports squad** (7 people): **sprint predictability 20–40% → 80–90%** in a month, BugRate brought to target, RnD for new platforms.
- At Gazprombank — **2023 merit certificate** for strong performance, **3rd in bugathon**; **40+ feature modules**, **~30–40%** faster builds, **SwiftUI team presentation** and rollout alignment.
- At Gazprombank — **faster MVP delivery** with **service-driving UI**: from **about six weeks to about three** per typical feature cycle.
- Now — **own B2C dating** from scratch: **PO + Lead iOS end-to-end**, analytics, backend coordination, deep UX/UI involvement.
- Focus on quality, predictable delivery, and impact on the **end product**, not ticket churn alone.

WHAT I WANT

- Looking for **Senior or Lead iOS** — both levels are interesting.
- Comfortable with **process uncertainty** when I can **shape and improve** how we work.
- Ready to **own outcomes** — people, timelines, quality.
- I want **impact on the end product**, not only ticket throughput.
- Full-time, **remote**; open to occasional business trips.

EXTRA SKILLS

- **Product analytics**: event taxonomy, funnels and segments in **Firebase / GA4**, registration and key flows for hypotheses.
- **Product owner** on my B2C: backlog, release-driven prioritization, syncs with backend / QA / design, increment acceptance.
- **AI in the workflow**: **Cursor**, **Codex**, agents — faster drafts and routine without replacing engineering judgment.

- **App Store**: shipping and updates, review dialogue, working through **rejections** to publication.
- **UI / design** — including as **UI designer** on my product: flows and screens in Figma, aligned visuals and states with iOS and admin (with a designer onboard).

EDUCATION & LANGUAGES

Bachelor's

Fundamental informatics and information technology

Kuban State University, Krasnodar · FKTI&IT

2018 — 2022 (incomplete degree)

Russian — native. English — B2 (upper intermediate).

EXPERIENCE

Dating app (B2C)

Sep 2025 — present

IT, internet · Founder & Lead iOS

- Roles I took: product owner, product analytics, primary UX/UI (most layouts and flows myself), Lead iOS; backend coordination and API acceptance.
- Analytics: set up Firebase GA4 events and funnels myself; analyzed registration and key-scenario funnels; retention for product hypotheses.
- Design: after the initial product contour, brought in a designer — unified visuals and states with iOS and the admin app.
- Team: Senior Python backend, QA, Junior iOS. AI acceleration: Cursor and Codex for logic/UI drafts, Telegram surveys, faster admin iterations without replacing engineering decisions.
- iOS: some screens in SwiftUI, rest in UIKit; native WebSocket chat (Socket.IO). Push: delivery and handling to UI, including chat logic. Deeplinks from push and external sources. Geo and matching: user location, nearby / same-city flows, client display and filtering. Modular architecture on CocoaPods.
- Backend and admin with the Python team: API contracts, realtime, internal admin for operations and metrics.
- Process: Git, feature branches; API alignment and iOS + backend release cycles.

KEY ACHIEVEMENTS

- ★ Built my own **Socket.IO chat** from scratch for user-to-user messaging in the app.
- ★ Shaped the **business model** around the app's **killer feature** to test the **hypothesis**.
- ★ **Design**: shipped the first version myself, then brought in a designer and unified the UI.
- ★ **Team**: assembled a small, focused squad — backend, QA, iOS.

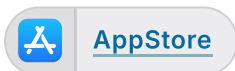

- ★ AI: latest models and tools (including Cursor/Codex) — faster development without replacing people on the team.
- ★ Metrics: set up funnel events in Firebase GA4 myself.
- ★ Return & retention: shaped return mechanics and steps to improve retention.

Okko

Jun — Sep 2025

St. Petersburg · IT, software · Team Lead iOS

- Led the sports squad of 7 (4 iOS, 3 QA).
- Before I joined, sprint predictability was about 20–40%; within a month we reached about 80–90% per sprint.
- BugRate was 1400 points; by quarter end we brought it down to the team target of 1200.
- Deep RnD for iOS 26 across three platforms (iOS, iPadOS, tvOS); documentation of critical items for Q4.
- Delivered the major “other broadcasts” feature ahead of schedule, freeing Q3 capacity and reducing Q4 load.
- Processes: Jira / Confluence / Bitbucket, Agile, code review, release process (FT), Git flow.
- Stack: CleanSwift, Coordinators, Swinject, Tuist, multi modular architecture, SwiftLint, SwiftGen, CoreData, SnapKit, Firebase, UIKit, GCD, CI/CD.

🏆 KEY ACHIEVEMENTS

- ★ Sprint predictability: 20–40% to 80–90% in a month.
- ★ BugRate: from 1400 to target 1200 by quarter end.
- ★ Other broadcasts rail — ahead of schedule, easing Q3/Q4.

Gazprombank

Mar 2022 — May 2025

Moscow · banking · Lead / Senior iOS

- Started as iOS Senior, grew to team lead.
- Team presentation on SwiftUI vs UIKit, integration, pros/cons, limits, rollout plan — aligned next steps.
- Multi-module migration: split the monolith into 40+ feature modules, ~30–40% faster builds; DesignSystem, Core, Foundation, and other modules.
- Introduced service-driving UI: tighter service/UI coupling cut a typical feature cycle from about six weeks to about three.

- Team took 3rd place in Gazprombank bugathon, closing 90+ bugs in the mobile bank. 2023 merit certificate.
 - Led major features: surveys (stories-like); system vs in-app theme sync (DesignSystem); Obj-C card scanner UI refactor; credit score; profile / e-gov; registration / auth / light clients; trusted devices; push; login and security.
 - Organized: onboarding and training for mid developers; regular 1:1s and feedback; mentoring; grooming, tech design, retros; releases (FT/FF for team modules).
 - Processes: Jira / Confluence / self-hosted GitLab, Agile, code review, releases, Git flow.
 - Stack: UIKit, SwiftUI, VIPER, Coordinators, Swinject, CocoaPods, multi modular architecture, RxSwift, SwiftLint, SwiftGen, CoreData, SnapKit, Lottie, Firebase, GCD, Combine, RxCocoa, SPM.
- App Store link unavailable due to sanctions.

🏆 KEY ACHIEVEMENTS

- ★ 40+ feature modules, 30–40% faster builds.
- ★ service-driving UI — cut a typical feature cycle from ~6 weeks to ~3 weeks.
- ★ 3rd place bugathon (90+ mobile bank bugs), 2023 certificate.
- ★ SwiftUI session for the team: vs UIKit, integration, trade-offs, and aligned next steps for adoption.

Livemaster

Oct 2020 — Feb 2022

Minsk · Middle iOS

- Integrations: Cappasity (3d.cappasity.com), Russian Post, DPD.
- Shipped: client loyalty program; buyer/maker profile; home screen refactor to Composition Layout; Push Extension for guaranteed delivery; 3D product scan and in-store visualization.
- Process: Agile (Scrum, story points, retros), code review, Jira.
- Stack: MVVM + Router, SnapKit, Firebase, Alamofire, ObjectMapper, RxSwift, RxCocoa.

[AppStore](#)

🏆 KEY ACHIEVEMENTS

- ★ Integrations: Cappasity, Russian Post, DPD.
- ★ Home on Composition Layout; Push Extension for reliable notification delivery.
- ★ 3D product scan and in-store visualization; loyalty program and buyer/maker profile.

NLP (medical startup)

Sep 2020 — Oct 2021

Moscow · medicine, clinical research · PulseWave app

IOS LEAD

- PulseWave measures pulse via camera/flash in real time. Not on the App Store — medical app validation not passed.
- Built: multithreaded pulse algorithm with cancellation; real-time pulse wave animation; measurement history with charts; paired devices and session exit; side drawer; multiple schemes (each scheme a separate app) to work around App Store limits.
- Process: iOS interviews; everyone reviews everyone; quarterly goals; Jira.
- Stack: MVVM + C, SnapKit, UIKit, Firebase, Alamofire, CoreData, Kingfisher, ObjectMapper.

The app is no longer available on the App Store.

KEY ACHIEVEMENTS

- ★ PulseWave: real-time pulse from camera/flash; faster algorithm with cancellation.
- ★ Measurement history with charts; paired devices; side drawer.
- ★ iOS Lead: hiring interviews, peer code review, quarterly planning in Jira.

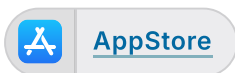

EPN · Backit

Jun — Oct 2020

Kazan · Backit cashback project

IOS DEVELOPER

- Shipped: bank wallet; new app navigation; UI refactor from frames to Auto Layout; moved from storyboards to programmatic UI.
- Process: iOS interviews; Scrum; Jira; code review.
- Stack: MVVM + C, SnapKit, Alamofire, CoreData, Kingfisher.

KEY ACHIEVEMENTS

- ★ Bank wallet and new in-app navigation.
- ★ UI move from frames to Auto Layout; storyboards dropped for programmatic UI.
- ★ iOS interviews; Scrum and code review.

Kuban Credit

Oct 2019 — Jun 2020

Krasnodar · banking

MIDDLE IOS

- Integrated FPS (earlier than competitors except Sberbank).

- Shipped: P2P transfers between retail customers; push system cutting SMS costs by about 60%; guaranteed delivery (Push Extension).
 - Built a 3-person iOS team. Processes: Jira, Scrum, code review, Redmine.
 - Stack: MVP, MVVM + C, SnapKit, Keychain, EasyDi, CoreData, Kingfisher.
- App Store link unavailable due to sanctions.

🏆 KEY ACHIEVEMENTS

- ★ FPS integration ahead of competitors (except Sberbank).
- ★ Push + Push Extension — ~60% lower SMS spend; P2P retail transfers.
- ★ 3-person iOS team formed.

EPAM Systems

Jul — Sep 2019

Moscow · systems integration, IT consulting

TRAINEE JUNIOR SOFTWARE DEVELOPER

- Learned: TDD; unit tests; CoreData migrations; code review; RxSwift; layout with SnapKit; MVP/MVC; SOLID; routing/coordinators; Clean Swift.
- Process: Trello, code review, DesignSync.
- Stack: MVP, MVC + R, EasyDi.

🏆 KEY ACHIEVEMENTS

- ★ Foundations: TDD, unit tests, CoreData migrations.
- ★ Clean Swift, coordinators, MVP/MVC, SOLID; SnapKit and RxSwift.
- ★ Workflow: Trello, code review, DesignSync.

Ilya Arzumanyan startup

Mar 2018 — Jun 2019

JUNIOR IOS DEVELOPER

- Built part of the home screen and profile; fixed bugs while growing mobile skills.
- Process: Trello, weekly dailies.
- Stack: MVP, MVC + C, Alamofire, Kingfisher.

The app is no longer available on the App Store.

🏆 KEY ACHIEVEMENTS

- ★ Contributed to home and profile.
- ★ Bug fixing and pace of delivery as a junior.

★ Weekly dailies and work in [Trello](#).
